QUARTEX-R

The robust control units of the QUARTEX-R series feature large operating interfaces and clearly tactile switching operations. Their square shape allows side by side assembly while the bevelled outer edges and the round keys make them appearing that stylish and flat. It's just the interplay of outer square shape and round control elements forming the distinctive design feature of this range. Another highlight are the colour rings around the control elements.

Degree of protection: IP65
Protection class   :   II

| illuminated push-buttons with marking option | toggle switches | selector switches | key switches | emergency stops |

SCHLEGEL ®
ELEKTROKONTAKT

The QUARTEX-R series fits the following contact blocks:

Modular contact system

Screw connections
Finger-protected acc. to VBG4
Type series **MT...**

Technical Data:

acc. to IEC/EN 60947-5-1
AC15, DC13
acc. to IEC/EN 61058-1
250V~ / 440V~
16(10)A / 10(6)A
Lamp socket: BA9s
Lamp output: max. 2W / 250V

Modular contact system

Cage-Clamp* technology
Finger-protected acc. to VBG4
Type series **DT...**

acc. IEC/EN 61058-1
400V~ / 250V~
10(5)A / 16(10)A
Lamp socket: BA9s
Lamp output: max. 2W / 250V

Modular contact system

Cage-Clamp* fast connection
system
Finger-protected acc. to VBG4
Type series **DS...**

acc. to IEC/EN 61058-1
250V~ / 400V~
16(10)A / 10(5)A
Lamp socket: BA9s
Lamp output: max. 2W / 250V

Standard contact blocks

Screw connections
Finger-protected acc. to VBG4
Type series **ET...**

acc. to IEC/EN 60947-5-1
AC15, DC13
acc. to IEC/EN 61058-1
250V~ / 440V~
10(6)A / 6(3)A
Lamp socket: BA9s
Lamp output: max. 2W / 250V
