

Kellems® Grips for Strain Relief

Use Kellems Strain Relief Grips to protect joints and terminals from cable and conduit pullout, for enhanced safety and security of your electrical cord, cable and conduit, and for NEC compliance.

Kellems Pulling Grips

Count on Kellems Pulling Grips to make your electrical installations quick and simple. They're made from durable galvanized steel strand so you'll use them again and again.

Kellems® Grips for Fiber Optic Cable

For your demanding fiber optic pulling and support applications, Kellems has designed an array of wire mesh grips, including our OPTISOK™ to help solve your communications cable challenges.

Kellems Cable Support Grips

Available in a variety of sizes and styles to suit every situation, Kellems Support Grips give your electrical cables the lift they need to avoid stress at the connections and the threat of power interruption.
